5 Recyclable Medication Adherence Package
www.mwv.com

Shellpak Renew is MeadWestvaco's newest medication adherence solution. Adapted from MWV's original Shellpak design to be easier to use and more compact, it features a curbside-recyclable outer carton and calendarized blister. The updated design helped Shellpak Renew win the Best Sustainable Pharmaceutical Packaging Award from the CPhI Pharma Awards.

6 Eco-friendly Blister Package
www.bilcaresolutions.com

Made from a standard polyvinyl chloride (PVC) film and an additive that makes the film biodegradable, Ecomply is a blister package that offers PVC-level protection without a PVC-level environmental footprint. Ecomply Film experiences 18.7% biodegradation in 45 days, when tested using ASTM D5511 standards. Ecomply films are available in clear, color, opaque, and a version that looks like paper.

7 Eco-friendly Label Facestock
www.labeltronix.com

Labeltronix Eco-Friendly Facestocks are made up of 30% to 100% post consumer waste. Products include a 100% post-consumer waste, recycled uncoated litho label, an embossing certified material and a wet-strength facesheet.

8 Paperboard Prescription Slider
www.keyboxco.com

Ecoslide-RX is a child-resistant yet senior-friendly package made from 100% recyclable material. The compliance carton contains no plastic in its secondary packaging and, unlike other paperboard compliance packages, it uses the minimal film-to-foil ratio to maintain its F=1 Child Resistant rating.

9 Eco-conscious Tubes
www.wwpinc.com

WWPledge packages are specifically designed for cosmetic and skincare applications. The product line includes tubes made from post-consumer, recycled plastic resins, with its 60mm tube, made with 85% PCR. Small compacts made of biodegradable plastic resins are also available.
